WHY CLINICAL DENTAL ASSISTANT?

Average Salary: \$32,738

Entry Level Education:

Post Secondary Non
Degree Certification

Job Outlook: 16.5%
Growth within the years
2018-2028 (Must Faster
Than Average)

Key Traits: Detail oriented,
dexterity, interpersonal
skills, listening skills, and
organizational skills.

This course provides hands on training on all aspects on how to support the front and back office of a dental clinic. In the 12 weeks you will be skilled in dental anatomy, infection control, dental assistant procedures, chair side assisting, introduction to dental radiography and imaging, dental specialties, restorative techniques, and dental clinical practice office management.

Interested in the dental industry? Graduating with a Clinical Dental Assistant (CDA) certificate will open doors for you for an entry level in the Dental field. As a CDA, you will experience clinical tasks to assist the patients. You will work under the supervision of the dentist and work closely with the dental hygienists. With the CDA certificate at hand you can search for career advancement within the field as an office manager, patient treatment coordinator, dental billing, dental sales rep, dental lab.

16.5%

of employment growth is projected between 2018 and 2028 according to the Labor Market provided by Employment Development Department.
